FIRE AT ESCULAPIA SPRINGS. HOW SHALL WE VOTE?

BY THE VIVA VOICE STYLE OR THE SECRET BALLOT.

A question has arisen in regard to the manner of voting at the ensuing city public attention. It is whether the old viva voce style of voting or the secret ballot system shall prevail. Plausible arguments and heories are advanced in favor of each, and exponents of either arguments and heories are advanced in favor of each, and exponents of either that must be decided at an early date. There is something of a conflict between the new state Constitution and the election law about to go into effect, but charter, which is not specific enough. Section 1 of the new election law asys:

section I of the new election law says:
In all elections hereafter held in this state
in any subject which may by law be subing state, district, country or municipal officers,
scept school trustees and other common
chool district elections, the voting shall be by
greated official balds, printed and distributed as
ereinatter provided, and no other ballots
halb to used.

All citv and town officials in this state be elected or appointed as provided in the ci of each respective town and city, until the ral election in November, 1893, &c., &c.

The city charter, while it does no specify the exact manner of voting says Qualified electors shall meet in the wards in which they reside and vote for Councilman.

And goes on to say "in the way in which they have been heretofore elected." THE LEDGE called 6n some of the lawyers of the city for their opinions and elicited the following: ethication asystem of the city for their opinions and argument. It seems perfectly clear to me that the secret official ballot must be used. The clause in the constitution, which those who advocate the viva voce system haug onto, does not refer to the manner of voting at all. It does not under that of municipalities. It inst used. The clause in the constitution, which those who advocate the vita voce system hang onto, does not refer to the constitution of the vital vocation of vital vocatio

Who the devil ever heard of S. E. Morss, the mythical discovery that The Eulletin brought forward to disprove a statement that The LEDGER never made?

MIDDLESDOROUGH is strongly Demo-cratic; and did you ever notice that this is the case with every other city in the United States where foreigners are in the majority? Take New York, for in-stance, where a large preponderance of the votes are foreign-born, and many of whom have only arrived in the country only a few days before the election.

WHILE our esteemed neighbor of Th WHILE our esteemed neighbor of The Bulletin has been beating the bushes to find some former Republican who will this time support Mr. CLEVELAN, the fact that Mr. POWDERLY, always a Democrat and the leader of the labor movement in the United States, has thrown the "stuffed prophe" overboard and declared for HARRISON, seems to have escaped his attention entirely. How blind some people are!

THE Democratic Philadelphia Time had this to say editorially of the late gathering of the Grand Army boys in Washington:

washington:
The whole country is both loyal and prosperous, the shackles have been stricken from every slave, and the Union is cemented as never before, as the result of valor and patroitism of the old soldiers and their dead comrades.

THE McKinley bill taxes snuff 56 ents a pound. It sells in the American cents a pound. It sells in the American market for 50 cents a pound—six cents less than the "robber Tariff tax." The statement of Ghover CLEVELAND that the amount of the Tariff is added to the price of an article looks like a Democratic campaign lie.

Democratic campaign lie.

The Democrats opposed the Homestead act; they opposed the National Banking system; they opposed the building of the great trans-continental railways; they opposed the building of the great trans-continental railways; they opposed the Indon and in National convention declared the war for its preservation a failure; they opposed the manufacture of steel rails in the United States, which to-day produces more of them than any other country on the globe; in short, they have opposed every important measure that has been placed on the National statute book in the past thirty years. It is quite natural, therefore, that they should oppose the new tin plate industry, and insult American workmen by saying they cannot make an article that is made by the most ignorant workmen of they cannot make an article that is made by the most ignorant workmen of England and Wales.
